Underwriting Guidelines

Our Underwriting Philosophy

We look at the total picture and evaluate applicants based on a number of criteria, including health history, cognitive status, daily activities and the ability to perform and maintain activities of daily living (ADLs) as well as instrumental activities of daily living (IADLs).

Activities of Daily Living	Instrumental Activities of Daily Living
 Eating Toileting Transferring Bathing Dressing Continence 	 Shopping Meal preparation Housework Laundry Managing money Taking medication Using the telephone Walking outdoors Climbing stairs Reading/writing
	Climbing stairs

Issue Ages

Applicants between the ages of 30 and 79* will be considered for coverage. There may be age limitations for some policy options.

Save Age

Premium will be based on the applicant's age at the time the application is signed. If the applicant's date of birth is within 30 days of the application signing date, premium will be based on the younger age.

^{*}New York issue age 30-75.

Suitability

A long-term care personal worksheet is included in the application packet and must be submitted with each application. You are responsible for verifying that coverage is affordable and appropriate for your client.

- Minimum financial guidelines include an annual household income of \$20,000 or \$50,000 in countable assets, not including the applicant's home
- This policy is not available to anyone who meets Medicaid eligibility guidelines
- If the applicant does not disclose financial information or if the disclosed information indicates the policy is not suitable, the applicant will receive a letter asking them if they want to continue with the application

Eligibility

The application clearly identifies impairments that make an applicant ineligible for coverage. You should NOT submit an application for anyone who:

- Answers "yes" to any question in the Health Insurability Questions section the application
- Is over or under the height and weight guidelines
- Requires assistance with any activities of daily living (ADLs)
- Requires assistance with any instrumental activities of daily living (IADLs)
- Receives Meals on Wheels
- Has previously been declined LTC coverage
- Is pregnant or receiving medical treatment to become pregnant
- Is disabled
- Uses a quad cane, crutches, walker, electric scooter, wheelchair, oxygen or respirator
- Is non-compliant with medications and/or treatment
- Has not pursued additional workups recommended by their physician
- Has a condition listed as a "decline" in the Medical Impairment section
- Has a living environment (as noted during the face-to-face interview)
 to be excessively cluttered, filthy, unsafe or with evidence of hoarding
- Has been confined to a nursing home or assisted living facility in the last six months

- Has received home health care services or adult day care in the last six months
- Has received occupational, physical or speech therapy in the last three months (prequalify the case with an underwriter if you believe the case may warrant review sooner than three months)

Note:

Higher-risk applicants may receive an adjusted offer or reduced benefits and/or higher premium. You will be notified if the approved policy is different than applied for.

Underwriting Rules

All available options may be added to the policy selected unless a specific combination of options is not allowed by underwriting rules.

- Underwriting will be the same for the base policy and selected optional benefits
- Addition premium will be required for optional benefits
- Optional benefits still being marketed may be added at the time of sale or within 60 days of policy issue with underwriter approval
- The total long-term care coverage, including coverage from other companies, cannot exceed:
 - A Maximum Monthly Benefit of \$10,000 and/or Maximum
 Benefit Limit of \$500,000 for all traditional long-term care policy benefits combined; and
 - A Maximum Monthly Benefit of \$50,000 and/or Maximum Benefit Limit of \$2,000,000 for traditional long-term care and long-term care rider coverage benefits combined

Rate Classes

The Medical Impairments section and the Build Chart will help you determine the appropriate rate class to quote.

- Applications should not be submitted for anyone who is over or under the weight guidelines, has an uninsurable health condition or is taking a medication associated with an uninsurable health condition
- It's recommended that an applicant never be quoted better than Select (the underwriter will add a Preferred allowance to the policy, if appropriate)
- Certain policy limits are placed on Class I and Class II health risks, including:
 - Maximum 60-month benefit multiplier
 - Maximum \$300,000 policy limit
 - Maximum \$5,000 monthly benefit
 - Minimum 90-day elimination period
- In addition, not all policy benefits are available for Class I and Class II health risks, including:
 - Security Benefit
 - Joint Waiver of Premium Benefit
 - Survivorship Benefit
 - Shared Care Benefit (available for Class I health risks with a maximum 36-month benefit multiplier, \$180,000 policy limit and/or \$5,000 maximum monthly benefit)
 - Waiver of Elimination Period for Home Health Care

Preferred	Select	Class I	Class II
15% allowance at underwriter discretion	100%	125%	150%
Applicant is considered a preferred risk and is eligible for all policy benefit options	Applicant is considered a standard risk and is eligible for all policy benefit options	Applicant is considered to be a higher risk for utilization of long-term care services	Applicant is considered to be a significantly higher risk for utilization of long-term care services
			Reserved for use at underwriter discretion. Do not quote Class II unless prequalified by an underwriter

Remember...

Quote the applicant based on their health as it is listed in the Underwriting Guidelines or how you have been advised to quote by underwriting, if applicable.

Criteria for Preferred Underwriting

In order to qualify for preferred underwriting and the 15 percent preferred premium allowance, applicants must meet ALL of the following criteria:

- 1. An applicant must have seen a physician for a head-to-toe physical exam and complete metabolic profile within the past two years
- 2. The applicant must have been tobacco free for the past two years
- **3.** He or she must fall within the minimum and preferred maximum range on the build chart
- 4. An applicant must not use a cane
- **5.** He or she must not take any prescription medications other than:
 - Allergy medications (excluding steroids)
 - Female hormone replacement
 - · Thyroid hormone replacement
 - Antacids and heartburn medication
 - Medication for controlled high blood pressure (readings of 140/90 or less for the past six months)
 - Medication for controlled cholesterol (cholesterol less than 250)
 - Medication for temporary, acute conditions
- **6.** The applicant must not be diagnosed with or treated for any of the following:
 - Asthma
 - Atrial fibrillation
 - Blood disease or disorder (excluding treated iron deficiency anemia)
 - · Blood clotting disorder
 - Cancer (excluding basal cell or squamous cell skin cancer)
 - Carotid artery disease
 - Chronic fatigue syndrome
 - Chronic obstructive pulmonary disease (COPD)
 - Chronic pain
 - Degenerative disc disease
 - Diabetes
 - Emphysema
 - · Fibromyalgia
 - First degree relative diagnosed with Alzheimer's or dementia

- Heart disease, including coronary artery disease and heart valve disorder (excluding mitral valve prolapse or controlled high blood pressure average reading less than 140/90 for the past six months)
- Hepatitis
- · Herniated disc
- Joint replacement
- Moderate osteoarthritis
- Neurological disease or disorder
- Peripheral arterial/vascular disease
- Polymyalgia rheumatica
- Psychiatric disease or disorder (excluding seasonal affective disorder or mild or resolved situational depression)
- Respiratory disease or disorder, excluding acute bronchitis, pneumonia, or exercise induced, reactive or extrinsic asthma
- Rheumatoid arthritis
- Sleep apnea
- Spinal stenosis
- Stroke
- TIA (transient ischemic attack)
- Tremor

- An applicant below the minimum weight is ineligible for coverage
- An applicant who is within the weight requirements but has other health conditions may be ineligible for coverage
- An applicant who exceeds the maximum Select weight and has any condition listed on the impairment guide as a Class I or Class II will be declined
- An applicant above the Class I Maximum weight is ineligible for coverage
- An applicant who has short stature due to a genetic condition or chronic medical condition is ineligible for coverage
- Build as documented in medical records or obtained during a face-toface interview

Uninsurable Health Conditions

Acoustic Neuroma (unoperated)

Acromegaly

ADL Deficit

AIDS/ARC

Adult Day Care within 6 months

Agoraphobia

Alcohol 4 or more drinks daily

Alcoholism with any current alcohol use

ALS

Alzheimer's Disease

Amputation due to disease, other

than cancer

Amputation 2 or more limbs

Amyloidosis

Ankylosing Spondylitis

Anorexia

Aplastic Anemia

Arnold-Chiari Malformation

Arrhythmia (uncontrolled)

Arteriovenous Malformation (AVM) (unoperated)

(unoperateu)

Arthritis requiring narcotic pain medication

·

Asperger's Syndrome

Assisted Living Facility
(resident within 6 months)

Ataxia

Avascular Necrosis (unoperated)

Back Pain (disabling or requiring narcotic pain medication)

Bell's Palsy (present)

Benign Positional Vertigo (BPV) (with falls)

Bipolar (diagnosed within 3 years, psychiatric hospitalization within 2 years, 2 or more psychiatric hospitalizations)

Blindness (not adapted or with

ADL/IADL limitations)

Bowel Incontinence

Buerger's Disease

Bulimia

Bullous Pemphigoid (active)

Cardiomyopathy (dilated)

Castleman's

Cerebral Aneurysm (unoperated)

Cerebral Palsy

Cerebrovascular Accident (CVA)

(2 or more)

Charcot Marie Tooth

Chronic Pain (requiring narcotics,

TENS unit, implantable stimulator,

ADL/IADL deficit)

Cirrhosis

Complex Regional Pain Syndrome

Confusion

Connective Tissue Disease

Cor Pulmonale

CREST Syndrome

Crohn's (multiple flares or with

complications)

Cushing's Syndrome

Cystic Fibrosis

Defibrillator (implanted)

Dementia

Dermatomyositis

Diabetic Complications (neuropathy,

nephropathy, retinopathy, gastropathy)

Dialysis

Dilated Cardiomyopathy

Disabled, except VA disability

Down's Syndrome

Dwarfism

Dystonia

D	ilated
_	
	arotid Artery Disease/Stenosis, fully recovered, after 6 months,
	bacco free 12 months
	perated, tobacco use within 12 months
	noperated, <70% stenosis, no symptoms, tobacco free 12 monthsS
	perated, in combination with heart disease, tobacco free
	2 months
	50% stenosis in combination with other peripheral vascular disease D
Н	istory of TIA or CVA with unoperated valvular heart disease D

Operated or unoperated in combination with Type I or Type II diabetes, <50% stenosis, no insulin use within 6 months, tobacco free
12 months
50-70% stenosis, insulin use within 6 months, tobacco free
12 months
<50% stenosis, tobacco use within 12 months
50-70% stenosis, tobacco use within 12 months
50-70% stenosis with operated heart valve disorder, or mild,
unoperated heart valve disorder
50-70% stenosis with unoperated, moderate heart
valve disorderClass II
50-70% stenosis with unoperated severe heart valve disorder D
>70% stenosisD
Carpal Tunnel Syndrome
UnoperatedS*
Operated, after 3 months, recovered
Castleman's
Catheter, urinary independently manages, not due to
neurogenic bladderS
CBD Oils
(handle per specific health condition)
Celiac Disease after 1 year, controlled
Cerebral Palsy
Cerebrovascular Accident (CVA)handle as Stroke
Cerebrovascular Disease
Brain imaging findings of single lacunar infarct, tobacco free
12 months
Single lacunar infarct, tobacco use within 12 month
Two or more lacunar infarcts
Small vessel ischemia or white matter changes considered
normal for age
Abnormal for age
Brain atrophy/volume loss
Chelation Therapy other than for hemochromatosis received
within 6 months
Cervical Spondylosis
Mild
Moderate to severe

Charcot Marie ToothD
Chronic Bronchitis handle as COPD
Chronic Fatigue, stable after 12 months, no functional limitations S-IC 5 year maximum benefit period, \$5,000 maximum monthly benefit, minimum 90-day elimination period
Any functional limitations
Chronic Hepatitis handle as Hepatitis
Chronic Pain Requiring more than 3 doses of narcotic pain medication per week or TENS Unit or implantable stimulator or with ADL/IADL limitations or with epidural steroid injection within 6 months
Chronic Regional Pain Syndrome
Cirrhosis D
Claudication handle as Peripheral Vascular Disease
Closed Head Injury handle as Head Injury
Clotting Disorder
Cognitive Impairment
Colitis, including infection or allergic reaction, single episode, resolved, after 6 months
Collagen Vascular Disease

colostomy/ lieostomy, cares for independently, nandle as per causeS-IC
Requires assistance to care for
Compression Fractures due to osteoporosis, or with functional limitations D All others S*-IC
Concussionhandle as Head Injury
Confusion
Congestive Heart Failure (CHF) single episode, recovered, after 12 months
Connective Tissue Disorder
Continuing Care Retirement Community, within 6 months
COPD (Chronic Obstructive Pulmonary Disease) Mild, tobacco free for 12 months
Tests (PFT's)
or symptomatic
The form M28872 may be used as a prescreen tool for clients with Chronic Obstructive Pulmonary Disease (COPD).
Cor Pulmonale
Coronary Artery Disease (angina, heart attack, Angioplasty, stent, or Bypass) After 6 months, stable, no limitations, no significant residual heart damage, tobacco free 12 months

With PVD or Carotid Artery Disease, tobacco free 12 monthsClass I-IC With PVD or Carotid Artery Disease, tobacco use within 12 months D In combination with diabetes, tobacco use within 6 months D In combination with diabetes, tobacco free 12 monthsClass I-IC With poorly controlled hypertension (average BP >158/89), or chronic congestive heart failure, or ejection fraction <45%
Corneal Transplant
CPAP handle as Sleep Apnea
CREST Syndrome
Crohn's in remission at least 2 years S After 2 years from diagnosis, 1-2 flares per year Class I With DMARDS Class I Multiple flares or with complications D
Cushing's Syndrome
Cystic Fibrosis
Deep Brain Stimulator
Deep Venous Thrombosis, after 6 months, single episode, recovered, no Greenfield/IVC (inferior vena cava) filter, no underlying clotting disorder
Defibrillator/Automatic Implantable Cardiac Defibrillator D
Degenerative Disc Disease handle as Herniated Disc
Degenerative Joint Disease handle as Arthritis
Dementia
Demyelinating Disease
Depression 2 or more psychiatric hospitalizations for any reason D Mild stable on medication 6 months S* Seasonal Affective Disorder S* Depression medication for menopause, no diagnosis of depression S*

Situational recovered, no psychiatric hospitalizations in the past 3 years
Depression with Electroconvulsive Therapy (ECT) or Transcranial Magnetic Stimulation (TMS) ECT/TMS >10 years ago, fully functional, maintained on antidepressants, no psychiatric hospitalizations after ECT/TMS
Diabetes Insipidus, controlled on medication
Diabetes Type II, Present < 20 years, controlled and stable with diet and exercise or oral medications, no diabetic complications or comorbid conditions, no increase in dosages or additions of diabetic medications for at least 6 months, tobacco free 12 months
Carotid Artery Disease, operated or unoperated <50% stenosis, no insulin use within 6 months, tobacco free 12 months

Diabetic macular edema, neuropathy, numbness or tingling of the extremities, regardless of cause, or nephropathy
Diabetes.
Dialysis
DiGeorge Syndrome
Difficulty walkinghandle as Balance Disorder
Disabled, collecting any type of disability benefits, other than VA disability D Aged out of disability benefits, or retired due to disability D VA Disability for mental nervous condition D
DISH (Diffuse Idiopathic Skeletal Hyperostosis)
Diverticulitis medically managed S* With bleeding, weight loss, or surgery recommended D
Dizziness Benign Positional Vertigo (BPV), not associated with falls
Multiple episodes, or progressive, or associated with falls D
Down's Syndrome
Orug Abuse treated, active in support group, drug free for >3 years Class I-IC Within 3 years D

Dwartism
Dystonia
EchocardiographyLeft Atrium >5.0 cmDEjection Fraction <45%
Edema If cardiac related handle as Congestive Heart Failure All others, after six months S to IC
Ehlers-Danlos Syndrome
Ejection Fraction < 45%
Electric Scooter Use
Emphysema
Encephalomalacia Stable on MRI imaging 5 years, and clinically stableIC, RMD
Epilepsy Diagnosed> 1 year ago, controlled with medication, no seizures for 1 year S 1 or 2 seizures per year Class I Poorly controlled D Treated with brain surgery D
Epstein-Barr Virus 2 years treatment free, full recovery, no residualsS <2 years since treatment, currently treated, or present
Factor II
Factor V Von Leidenhandle as Blood Clotting Disorder
Factor VII
Factor VIII
Factor IX
Factor X
Factor XI
Factor XII
Fainting handle as Dizziness

Falls, single episode Multiple episodes, or with injuries	
Familial Tremor	handle as Tremor
Family History (biological parents or sit including but not limited to Alzheimer's	
2 or more relatives (biological parents o siblings) with any type of dementia	
Fatigue, after 12 months, resolved Within 12 months, or with functional lim	
Fatty Liver incidental finding, not diagno	osed as NASHS-IC
Feeding tube	D
Fibromuscular Dysplasia	D
	5 years maximum benefit period, \$5,000 maximum monthly benefit, ninimum 90-day elimination period ain medication per weekIC ing more than 3 doses
Foot Drop unilateral, mild, nonprogress All others	
Fracture-Traumatic, one bone, non-spir Spine Fracture, full recovery, after 6 mo In combination with mild osteoporosis T In combination with moderate to severe or worse	nths
Fracture-Non Traumatic, in combination osteoporosis, not on Medication, or with	
Frailty	D
Friedrich's Ataxia	D
Fuch's Dystrophy	S *

Gastric Bypass/Banding/Sleeve, after 2 years, fully recovered, no complications
Gaucher's Disease
Glaucoma, stable vision, controlled eye pressures
Glomerulonephritis
Grave's Disease, after 12 months
Guillain-Barre Syndrome, after 12 months, no residuals
Handicap PlacardClass I
Hashimoto'sS*
Head Injury, after 6 months, no residuals S-IC With residual functional or cognitive impairment, or multiple D
Heart Attack/Heart Disease handle as Coronary Artery Disease
Heart Transplant
Heart Valve Disorder/Insufficiency/Murmur/Regurgitation/Stenosis, operated 1 or 2 valves, fully recovered, after 6 months
or planned
Hematuria, Nontobacco, stable after 3 monthsS*Tobacco with negative work upSTobacco with no work-upDChronic, stable, after 2 years, negative work upSHemiplegiaD

Hemochromatosis, after 12 months, successfully treated with phlebotomy, or chelation, and stable ferritin level not more than 25% above normal, and with normal liver function tests	IC
Hemophilia	D
Hepatitis, any chronic, active, or alcohol related, or with residual liver damage. After 2 years, successfully treated, or cleared spontaneously, with most recent 2 consecutive PCR lab work as undetectable	IC D .S
Hereditary Hemorrhagic Telangiectasia	D
Herniated Disc/Degenerative Disc Disease (DDD) Unoperated, epidural steroid injection within 6 months, or additional epidural steroid injections planned	IC D
Operated, after 6 months, full recovery, hardware (EXCLUDES Harrington Rods) no ongoing problems, no plans to remove hardware Operated or unoperated, requiring more than 3 doses of narcotic pain medication per week, or physical therapy within 6 months, or advised to have therapy, injections, surgery, or implantable	.S
stimulator for pain control Epidural steroid injection, or trigger point injection, after 6 months mild to moderate disease	IC D D

High Blood Pressure, after 3 months, compliant with treatment: Average BP <140/90
Hip Replacement handle as Joint Replacement
HIV Positive
Hoarder D
Hodgkin's Disease stage I, after 3 years, fully recovered All others, fully recovered, after 5 years Treated with bone marrow or stem cell transplant
Home Health Care received within 6 months
Huntington's ChoreaD
Hydrocephalus with or without shunt
Hypogammaglobulinemia
Hypoparathyroidism/Hyperparathyroidism
Hypothyroidism/Hyperthyroidism
IADL Impairment
Idiopathic Hypertrophic Subaortic Stenosis (IHSS)handle as Cardiomyopathy
Idiopathic Thrombocytopenia Purpura (ITP) Platelet count >50,000 for 1 year
Imbalance
Immune Deficiency

Impaired Glucose Tolerance/Elevated Blood Sugar/Elevated Hgb A1C
Glucose \leq 125, creatinine \leq 1.3
A1c < 6.0S A1c < 6.1-6.4 with no condition listed as a comorbid under
diabetes sectionS
A1c 6.1-6.4 with condition listed as comorbid
under diabetes sectionhandle as Diabetes
A1c >6.4handle as Diabetes Creatinine >1.3D
Implantable Stimulator
Incontinence, urinary, stress, manages independently. S* Urinary, uncontrolled, or requires assistance with management. D Stool D
Interstitial Cystitis
Mild, well established diagnosis, OTC meds only
agents, Elmiron
Severe, bladder instillations, TENS, surgical cases
Interstitial Lung Disease handle as COPD
Irritable Bowel Syndrome, controlled, weight stable
Joint Injections/Stem Cell, mild to moderate disease,
fully functional, no surgery recommended, 1-2 single injection(s) per yearS
Mild to moderate disease, fully functional, no surgery
recommended, 3-4 single injection(s) per year
Mild to moderate disease, fully functional, no surgery recommended, 2 injection series per year
Mild to moderate disease, fully functional, no surgery
recommended, >2 injection series per year
Severe disease
Spinal injections handle as Herniated Disc or Spinal Stenosis
Stem Cell, if for other than Joint injections
Joint Replacement, one joint after 3 months, fully recovered, no use of
assistive devices, no longer receiving physical therapyS
Two joints build not rateable, fully recovered, no limitationsS-IC
Two or more joints, rateable build

More than 3 joints
Kidney Disorder, diagnosed with mild renal insufficiency,
stable 2 years
Kidney failure, single episode, fully recovered after 2 years
Kidney removal (1), after 1 year, with stable kidney function
Kidney Transplant
Kidney Donor after six months, normal function in remaining kidney S
Knee Replacement handle as Joint Replacement
Labrynthitis handle as Dizziness
Lacunar Infarct Single handle as Stroke Single in combination with white matter or small vessel ischemia D Multiple D
Lap Band Surgeryhandle as Gastric Bypass
Latent Autoimmune Diabetes of Adult (LADA)
Left Atrial Enlargement/Left Atrial Volume, \geq 5.0 cm.DLeft atrial volume \geq 34 ml/m2.D
Leukemia AML, CML, Hairy Cell D Acute, after 3 years IC CLL
Stage 0 or I, WBC <15,000 for 2 years
Leukopenia, stable 2 years WBC >2.5
Liver Transplant

Living Environment noted during face-to-face interview to be excessively cluttered, filthy, unsafe, or with evidence of hoarding
Lou Gehrig's Disease
Low Back Pain handle as Back Pain/Strain
Lung Transplant
Lupus, discoid, after 12 months S Systemic D
Lyme Disease, after 12 months, fully recovered, no residualsS*-IC Undergoing treatment, or with residuals, or with chronic diseaseD
Lymphedema, medically managed, no limitations
LymphomaStage 0, after 1 year successful treatmentS-ICStage I or II, after 2 years, in complete remission.S-ICStage III after 4 years, in complete remission.S-ICStage IV after 5 years, in complete remission.Class ILow-grade, after 1 year, not requiring treatment.Class ICutaneous T Cell Stage I, stable 3 years.Class IStage II or greater, or Stage I not stable 3 years.DTreated with bone marrow or stem cell transplant.D
Macular Degeneration, one eye S Both eyes IC-D
Manic Depression handle as Bipolar
Marfan's SyndromeD
Marijuana Recreational Current use 3 times per week or less, no DUI within 3 years, no drug abuse or memory loss/forgetfulness S > 3 times per week D CBC abnormal with polycythemia or hypoxia D Inhalation use with co-morbid per UW Guide Class I-D Medicinal D 1 year out from last use S*
Medicaid Recipient

Medullary Sponge Kidney	IC
Melanoma handle as	Cancer
Memory Loss, present or within 1 year	
Meniere's Disease, after 6 months, symptoms controlled, no limitations	
Meningioma removed, after 12 months, no limitations. Incompletely removed, stable imaging for 2 years, no residual neurological impairment. Surgery planned Recurs after surgery. Stable at least 3 years, surgery not planned	Class I D D
Meningitis, after 12 months, fully recovered	
Mental Retardation	D
MTHFRhandle as Blood Clotting D	isorder
Microalbuminuria >20 Microalbumin ratio > 30.	
Migraines, not daily, controlled with medication, no restrictions or limitations	S n
Mild Cognitive Impairment	D
Mitral Valve Prolapse	S*-IC
Mixed Connective Tissue Disease	D
Monoclonal Gammopathy <3 years. ≥3 years, asymptomatic	.Class I
Moyamoya	D

MRSA Single occurence recovered after 1 year......S Multiple Sclerosis D Muscular Dystrophy......D Mycosis Fungoides handle as Lymphoma Cutaneous T Cell Myelofibrosis Myocardial Infarction..... handle as Coronary Artery Disease Narcotic Pain Medication Reason for narcotic pain medication use.....handle as specific medical impairment All others, use of narcotic pain medication for acute (not to exceed 14 days) self-limiting condition or taking fewer All others, requiring more than 3 doses of narcotic pain **NASH** - Nonalcoholic Steatohepatitis, after 2 years, ALT <2x normal, weight within Select maximum, well controlled diabetes (if applicable) and well controlled lipids, and <3 alcoholic drinks per week, **Nebulizer** use, within 6 months, other than for acute infection

Neurotibromatosis
Neurogenic Bowel or Bladder
Neuropathy, mild, fully evaluated, no limitations
Neutropenia, stable 2 years neutrophils >1,000S-IC
Non Hodgkin's Lymphoma handle as Lymphoma
Nursing Home Confinement, after 6 months, full recovery, no limitations
Obesityhandle as Build chart
Obsessive Compulsive Disorder, after 3 years, controlled on medication Fully functional S-IC Limits functional ability D Psychiatric hospitalization within 5 years D
Occupational Therapy
Optic Neuropathy or Neuritis, refer to specific cause
Organic Brain Syndrome
Organ TransplantD
Osler-Weber-Rendu Syndrome
Osteoarthritis handle as Arthritis
Osteomyelitishandle as Avascular Necrosis
Osteoporosis, T score -2.5 to -2.9, no tobacco 1 year, no history of nontraumatic fractures, regular weight bearing exercise, tobacco free 1 year

Oxygen use, including lung condition, sleep apneal Intermittent use with migraine headaches	
Pacemaker, after 3 months Recommended or surgery pending	
Paget's Disease, no symptoms and no limitations With symptoms or history of fractures	
Pancreas Transplant	D
Pancreatitis, after 12 months, single episode, fully Recurrent, resolved with Cholecystectomy	S
Panic Attack/Disorder	handle as Anxiety
Paralysis	D
Paraplegia	D
Parkinson's Disease Current diagnosis Positive genetic screening (if GINA allows) New onset symptoms concerning for possible PD	D
Parkinsonism	D
Patent Foramen Ovale surgically corrected after 6 Surgically corrected, single TIA or CVA prior to su Surgically corrected, TIA or CVA after surgery Not corrected, incidental finding, no history of clo no underlying clotting disorder	irgeryClass I-IC D ts, TIA, CVA,
Pemphigus Vulgaris	D
Periodic Limb Movement Disorder	
Perinheral Neuronathy	handle as Neuronathy

Peripheral Vascular/Arterial Disease Current tobacco use or use within last 12 months
Physical TherapyAcute, self-limiting.S*Completed, after 3 months for knee and hip, recovered.S*-ICCompleted, after 6 months for back, recovered.S*-ICCurrent.DAge <65, within 3 months for an acute, self-limiting condition
Pick's Disease
Pituitary Adenoma removed, after 12 months, no limitationsStable x3 years, no surgery plannedSurgery planned
Plantar Fasciitis
Platelet Abnormality handle as specific condition
Pneumonia, after 3 months, single episode, fully recovered
Polio fully recovered, no limitations, no assistive devices. .S Fully recovered, no limitations, leg brace. .IC With recurrence or limitations. .D
Post Polio Syndrome after 2 years, nonprogressive, no limitations, no assistive devices IC Progressive weakness or fatigue, or with limitations D
Polycystic Kidney Disease

Polycythemia, unknown etiology, not resolved
Polycythemia Vera after 2 years, managed with medication or Phlebotomy, platelets <450,000
Polymyalgia Rheumatica mild, after 1 year, no limitations
Polymyositis/Dematomyositis
Polyneuropathy
Post Herpetic Neuralgia
Post Traumatic Stress Disorder (PTSD), after 12 months,controlled, fully functional.S-ICAfter 12 months, not adequately controlled or with.D
Power of Attorney (POA) active D Inactive IC
Pregnancy. D Currently attempting and/or planning within the next year, or undergoing fertility treatment, or evaluation for same. D
Prep Medication, used to prevent HIV* <6 months PrEP started or planned use
≥6 months, if compliant with CDC guidelines, no complications, normal lab results (HIV, renal function, Hepatitis B & C, liver function tests, sexually transmitted infection testing)
*Medical impairment does not apply to New York applicants.

Primary Biliary Cirrhosis
Prostate Specific Antigen (PSA)handle as BPH
Prosthetic Limb One, limb loss due to trauma or cancer
Protein C or S Deficiency handle as Blood Clotting Disorder
Proteinuria, with kidney disease or diabetes
Pseudotumor Cerebri
Psoriasis, mild to moderate, controlled with medication .S* Severe. .IC With DMARD use .Class I
Psoriatic Arthritis handle as Rheumatoid Arthritis
Psychosis
Pulmonary Edema
Pulmonary Embolism, after 6 months, single episode, fully recovered
Pulmonary Fibrosis, localized, nonprogressive, normal PFT's, after 2 years IC Active, progressive disease, abnormal PFT's D
Pulmonary HypertensionSIncidental findings, no symptomsSIncidental finding < 40 RVSP, stable echocardiogram for 1 year
Quad Cane Use
Quadriplegia
Raynaud's
Reactive Airway Disease
Reflex Sympathetic Dystrophy (RSD)
Renal Disease/Failure

Residential Care Facility Resident within 6 months
Restless Leg Syndrome
Retinal Artery Occlusion Class I One Class I One, in combination with Diabetes Class II, 2 years Two or more D
Retinal Vein Occlusion One S One, in combination with Diabetes Class I Two or more D
Retinitis Pigmentosahandle as Blindness
Rheumatoid Arthritis handle as Arthritis
SarcoidosisIn remission 10 or more yearsSIn remission 3 years, treatment freeClass ICurrently treatedDDisease present outside the lungsD
Sciatica
Schizophrenia D
Scleroderma D
Sclerosing Cholangitis
Scoliosis Mild, normal gait, no impairment of internal organ function, normal PFTS
Scooter Use
Seizures handle as Epilensy

Shingles, after 6 months, fully recovered
Short Stature, due to chronic disease or genetic disorder
Shy-Drager Syndrome
SICCA handle as Sjogren's Syndrome
Sickle Cell AnemiaDTrait only, no active diseaseS*Active diseaseD
Sick Sinus Syndrome Sith pacemaker S Without pacemaker, no symptoms IC Without pacemaker, with dizziness or fainting, or pacemaker recommended but not done D
Sjogren's Syndrome Mild, dryness of eyes and mouth only
Skin Cancer handle as Cancer
Sleep Apnea Mild AHI< 14.9 events per hour, after 3 months with or without treatment
Social Security Disability receiving
Social Withdrawal
Small Bowel Transplant
Speech Therapy
Spina Bifida D

Spinal Stenosis operated, fully recovered, no residuals or ongoing
symptoms, after 6 monthsS
Unoperated, no ADL limitations, mild or moderate
Unoperated, severe or surgery recommendedD
Operated or unoperated, within 6 months, or ADL/functional
limitations, or chronic pain requiring more than 3 doses of narcotic
pain medication per week, or advised to have therapy, injections,
surgery, or implantable stimulator for pain control
Epidural steroid injection, after 6months, mild to moderate
spinal stenosis
Epidural steroid injection, after 6 months, severe spinal stenosis $\dots \dots D$
More than 2 injection series per year
Operated, 2 or more prior back surgeries with ongoing
chronic/recurrent back pain requiring treatment
Stem Cell Injections
Stem Cell TransplantD
Stent handle as specific condition
Stroke
Single episode, fully recovered after 2 years, no limitations,
tobacco free 12 months
Two or more
In combination with any of the following:
Atrial Fibrillation chronic, or PAF
Unoperated carotid stenosis
Heart valve disorder D
Average blood pressure reading >159/89
Previous TIA(s)
Diabetes
Residual weakness or functional loss
Tobacco use within the past 12 months
Occurred while adequately anticoagulated
Peripheral Arterial/Vascular Disease, other than carotid
artery disease D
Patent Foramen Ovale (PFO) unoperatedD
Patent Foramen Ovale (PFO) operated, no stroke or TIA
after surgeryClass I-IC
Patent Foramen Ovale (PFO) operated, stroke or TIA
after surgeryD
Clotting Disorder

Subarachnoid Hemorrhagenandle as Stroke
Subdural Hematoma, after 6 months, recovered, no residuals
Suicide Attempt One, after 5 years
Suicidal Ideation within 2 years
Supraventricular Tachycardia (SVT)
Surgery, requiring general anesthesia, planned, not completedD
Syncope, acute, negative workup, after 3 months, no residual S* Vasovagal with injury D Recurrent D
Systemic Lupus
Temporal Arteritis, after 12 months, fully recovered
TENS Unit Current use, rate for specific health condition
Thalassemia Minor
Major
Thrombocytopenia, without splenectomy, platelet count >50,000 for 1 year
Thrombocytosis, platelet count >650,000
Thrombosis
Timed Get Up and Go (TGUG) <11 seconds
Tie Douioui eux nandie as migenninal Neuralgia

Tobacco Use within 2 years
Tobacco use within 1 year in combination with comorbid condition
Celebratory cigar up to 1 per month
CBC abnormal with polycythemia or hypoxia D
Torticollis resolved with Botox, after 6 months
Tourette's Syndrome fully functional, no limitations
Transgender/Transsexual Completed all gender reassignment surgeries, recovered, no additional surgery planned
Transient Global Amnesia handle as Amaurosis Fugax
Transient Ischemic Attack (TIA) single episode, fully recovered after 1 year
In combination with any of the following: Atrial Fibrillation, chronic or PAF

Transplant (except cornear) organ, bone marrow, stem cen
Transverse Myelitis
Tremor fully evaluated, benign familial, no limitations, mild to moderate. S Not fully evaluated, with limitations, or gait disturbance D Benign Essential Tremor age >65, present at least 10 years, not S* progressive, no limitations S*
Trigeminal Neuralgia After 12 months managed with antispasmodics or anticonvulsants, no limitations
Tuberculosis after 12 months, treated, fully recovered, normal PFT's S* Present or with lung damage or other organ involvement
Turner's Syndrome D
Ulcerative Colitishandle as Crohn's
Undifferentiated Connective Tissue Disease
Uveitis
Valvular Heart Diseasehandle as Heart Valve Disorder
Varicose Veins With history of leg ulcers or pending surgery
Venous Insufficiency S With history of leg ulcers or pending surgery D
Ventricular Tachycardia Controlled on medication 6 months S With implantable defibrillator D
Ventriculoperitoneal Shunt
Vertigohandle as Dizziness
Von Hippel-LindauD
Von Willebrand's Disease
Waldenstrom's Macroglobulinemia
Walker Use

Watchman Device handle as Atrial Fibrillation
Weakness, other than related to acute, self-limiting condition D
Wegener's Granulomatosis
Weight Loss, unexplained, or not fully evaluated
Weight Loss Surgery, after 2 years fully recovered, no complications, no revisions planned
Wheelchair Use
Wilson's Disease
Wolff-Parkinson-White Syndrome, after 6 months, ablated, not present
Workers' Compensation receiving

Completing the Application

Requirements

In order to determine an applicant's eligibility, additional information may be requested following submission of the application. This chart provides a quick overview.

MIB	Pharmaceutical	Medical	Personal Health	Cognitive
	Check	Records	Interview	Assessment
All applicants	All applicants	Mandatory • Ages 60-79 UW Discretion • Ages 59 and below	Telephone • Ages 30-64 Face-to-Face • Ages 65-79 • Younger ages at underwriter discretion	Included with telephone and face-to-face interview • Age 60-79 • Younger ages if history requires cognitive assessment

Ages 60-79: A complete head-to-toe physical examination and complete metabolic profile (CMP)* chemistry lab panel is required within the past 24 months.

Age 59 and below: A favorable complete physical assessment — an examination routinely completed during a visit for a specific concern (e.g. migraine or sinusitis appointment). Vital signs, build, and a brief review of systems must be recorded during the assessment to qualify. If the client has not seen a physician within the last 24 months, they have an option of scheduling a paramed/lab at Mutual of Omaha expense. NOTE: Paramed/lab will not be offered, Mutual of Omaha expense, if application, pharmacy check, or MIB indicates the client has a health condition(s) that would normally require regular follow up with a physician. If this is the case, the exam would need to be with a physician and at the client's expense.

All ages: For preferred, a benefit period > 5 years, or maximum monthly benefit >\$8000, a favorable CMP is mandatory. Mutual of Omaha will not pay for a CMP in this instance, it would be at the client's expense.

*A Comprehensive Metabolic Panel (CMP) is a group of blood tests that provide an overall picture of your body's chemical balance and includes the following; albumin, alkaline phosphatase, ALT, AST, BUN, calcium, chloride, CO2, creatinine, glucose, potassium, sodium, total billrubin and total protein.

Lab/Testing/Paramed*: - Any additional lab or testing may be requested by the UW at their discretion. This may include, but is not limited to, a CMP, a prostate specific antigen (PSA,) Hgb A1C, mammogram, bone density scan, or radiology studies. These would be at the client's expense if the lab/testing should have been followed up as part of a Dr. order or recommendation, but not yet completed. In some circumstances, we may offer at our expense*

*If Mutual of Omaha is offering to pay for additional Lab/Testing/Paramed at their expense, the process will be handled by Mutual of Omaha and followed up by Case Management as any other Underwriting Requirement. Agents should not request Lab/Testing/Paramed without talking to underwriting first.

Preparing Your Client for the Personal Health Interview

- Explain what comes next in the underwriting process using the Next Steps brochure.
- Let the applicant know he or she will be required to complete a personal health interview and help him or her compile a list of doctors' names and medications
- Recommend your client set aside one hour for the interview and explain the importance of giving the interview his or her full attention
- Give the applicant a heads up that a cognitive interview also may be conducted
- Indicate on the application the best time to contact the applicant for a telephone or face-to-face interview. A representative will call your client to schedule an interview after the application is received
 - For a telephone interview: the scheduler will set up a convenient time with your client. It may be possible to do the interview at the time of the initial call if both your client and the interviewer are available
 - For an in-person interview: the interviewer will schedule a convenient time with your client
- If hearing loss prevents an applicant from completing a telephone interview, include a note with the application that a face-to-face interview is needed. For deaf applicants, please indicate if they are able to read lips or communicate using sign language
- If an interpreter is needed, please notify us as soon as possible prior to the interview date
- A face-to-face interview must be conducted in the applicant's home
 where he or she resides. It cannot be completed at their place of work,
 a relative's home or in a public place, such as a restaurant (Home
 includes: Primary residence, owned vacation home or owned 2nd
 residence. It does not include a recreational vehicle (RV) even if it is the
 applicant's residence).
